

How does who participates in science affect solutions?

Is a solution the best solution?

Heart valves and seat belts are made that only fit men's bodies (significantly increasing mortality rates for women)

Al cropping algorithms for Twitter/Zoom have racial biases

Voice-recognition software only recognizes the voices of men

Murphy, M. C., Mejia, A. F., Mejia, J., Yan, X., Cheryan, S., Dasgupta, N., et al. (2020). Open science, communal culture, and women's participation in the movement to improve science. Proceedings of the National Academy of Sciences, 117(39), 24154–24164. https://doi.org/10.1073/pnas.1921320117

Data

Cloud-based data

Easier to collaborate

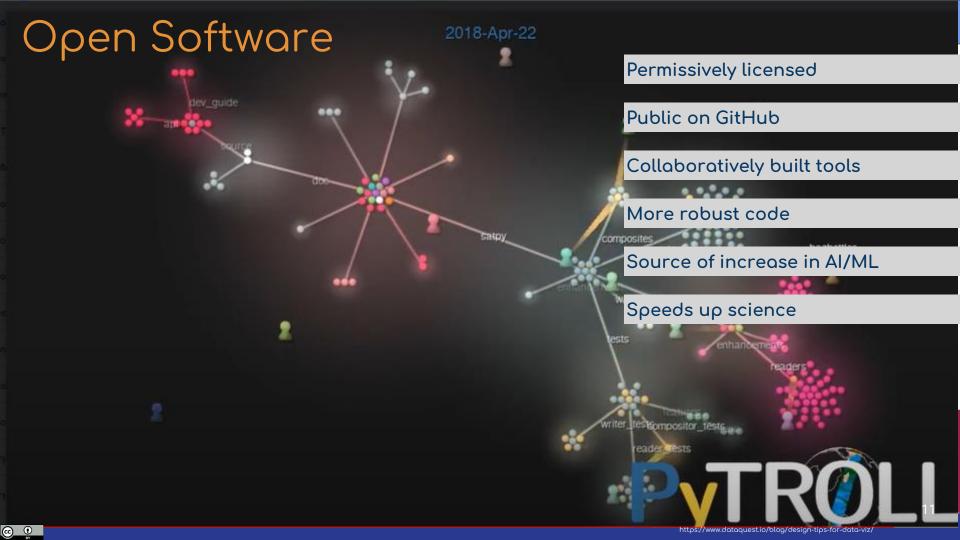

Easier to reproduce and build on

Access not bandwidth-limited

More Interdisciplinary research

Broadens participation

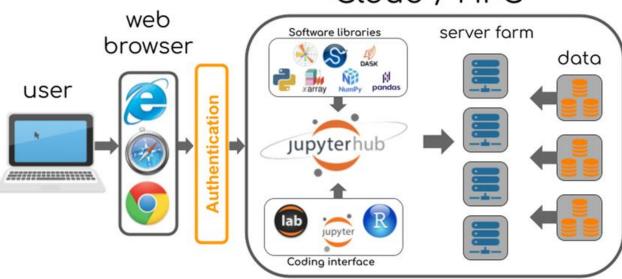

Open Cyberinfrastructure -Science Data Platforms

Cloud / HPC

Platform agnostic, open source infrastructure solutions

Developed by the community

Rapidly becoming default for science

Creates Research That Is:

Cited more

Creates a bigger impact

Increases transparency

Generates more scholarly collaborations

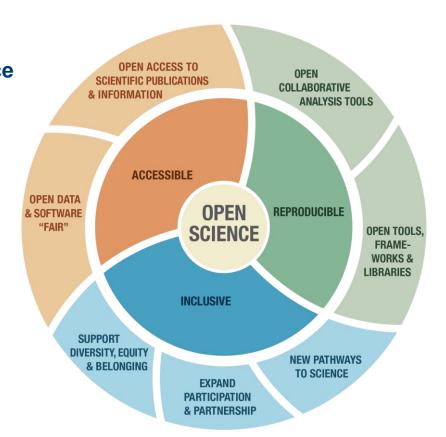

Inclusive Science means More:

Collaborative projects

Access to 'hidden knowledge'

Equitable Systems

Participation

Why Now?

We **now** have the tools to make open science a reality. Advances in technology have created accessible, reproducible, inclusive science at a scale not possible a few years ago.

There is national and global momentum for the move to open science.

Equal and open access benefits the public

Why Open Science?

We are facing **Big** Challenges:

Covid, Climate change, ...

We need **more** people - more hands, more eyes, more brains - with diverse experiences to participate so that we ask the best questions and find the best solutions

Open Science:

- Accelerates the pace of science
- Increases the impact of science
- Expands applications of data and science
- Shares hidden knowledge & expands participation in science

NASA's Open-Source science is the *activation* of an open science community

A continuum of open-source science

Data access (\$\$)
Accessible Publications (\$\$)
Siloed systems
Limited communication
Proprietary Software
"Closed-Tent" culture

Free unlimited data access
Fully documented open software and algorithms
Fully linked data and publications
Open Access Journal publications
Fully Transparent processes
Reproducible across platforms
"Teaching" culture
Open science meetings

FULLY OPEN

FULLY CLOSED

No public access data No publications No insight into processes No reproducibility "Black Box" culture

Free data access
Open software and algorithms
"Green" Journal publication
Documented processes
Reproducible in specific environments
"Open-Tent" culture

Leading the Path to Open-Source Science

Transform to Open Science (TOPS) is a \$40 million* 5-year NASA Science Mission Directorate mission

Objectives:

2023

- ★ Increase understanding & adoption of open science.
- ★ Accelerate major scientific discoveries.
- ★ Broaden participation by historically underrepresented communities.

2024

2026

2025

Year of Open Science

Goals for 2027:

2027

- ★ 20K earn Open Science Badge
- ★ 5+ major discoveries
- Increase participation of underrepresented groups by 2x

*pending appropriations

2023 is NASA's Year of Open Science

TOPS will be energizing and uplifting open science across the scientific community through:

Engagement

Capacity Sharing Resources

Incentives

Moving towards openness

Engagement:

High level support and visibility

• Community building

Conference Visibility

Annual 2023 Meeting: Open Science theme Promote & Launch the TOPS Open Science Course Booths, Events, Workshops, Plenary Talks, Comms AGU, AMS, AAS, AAAS, and more....

Outreach
Monthly Community Forums
TOPS Community Panel
Email list
GitHub (discussions enabled)

Website

Capacity Sharing - Resources: Open Science Curricula 5 Modules Organized as a Scientific Workflow

What is open science, why does it benefit me, and why does it benefit the greater scientific community?

How to share software

Best practices for sharing all results and analysis, as well as peer reviewing

ETHOS OF OPEN SCIENCE

OPEN TOOLS & RESOURCES

OPEN SOFTWARE

OPEN DATA

OPEN RESULTS

How to use popular open science tools

How to effectively use and share open data

Complete All 5 & earn TOPS Open Science Badge & Certification

Earn Badges at Each Level

Capacity Sharing: Resources

- Open Science Course in Open edX
 - High quality, interaction Open Online Course
 - Free, public, open for in-person, virtual, and independent learners
 - Videos / quiz / interactive activities/workbooks
 - Fast-pass option for experienced open science practitioners
 - o Open edX LMS tracks learners, completion of modules, data analytics
- Incentivize completion of course
 - Gamification: Certification / badges
 - o Prizes, challenges, and bootcamps

- Make it easy & everywhere
 - Workshops at all big meetings
 - Workshops at science team meetings
 - Workshops through virtual cohorts

Capacity Sharing within the Community

Scientists to help teach modules at events and act as Open Science champions

Cohorts

Engage with learners model to increase Open 5 modules to selected Science Badge achievement

Summer Schools

Institutions selected to run through a virtual cohort 8-12 weeks of teaching the science teams + open competitive student/early career researchers

Curriculum **Expansion**

Groups funded to migrate/create discipline specific modules and data science skills modules to Open edX TOPS platform

Hackathons

More hackathons that advance data science skills and open science

Incentives: Open Science Awards

- Societies create & manage TOPS Open Science Prizes
 & Awards programs
 - Award Purpose: To reward significant leadership and progress toward open science and showcase the benefits of open science
- Work with societies to evaluate and update their existing awards and recognitions to:
 - Include open science activities as review criteria
 - Where possible allow for team nominations

Moving towards openness: Year of Open Science and the Future

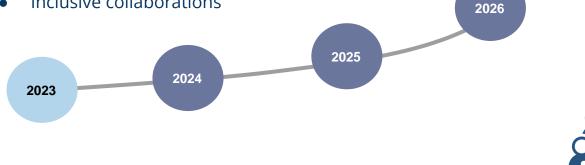

Require a lot

Our proposed plan is to use 2023 Year of Open Science to build momentum and support to move towards more openness in science.

- Holding open meetings
- Sharing hidden knowledge
- Inclusive collaborations

2027

Require a little

Update necessary systems to increase visibility

Open Science Results Speak for Themselves..

"We're deeply grateful to all the open source contributors who made our work possible." - Dr. Katie Bouman

Paola Masuzzo

image:)

Replying to @ChelleGentemann and @theNASEM

An aspect we should talk more about, open

research practices as a driver to a real reform in

the research endeavour. I try to depict it in this

"The open source community is very important for scientists; imagine if we had to do everything from scratch every single time." - Dr. Chi-Kwan Chan

We "greatly improve[d] our own work by adopting well-tested community packages that contain the collected wisdom of many other projects." - Dr. Lindy Blackburn

"with the open source projects in NumFOCUS, we were able to iterate our algorithms so fast that they enabled us to finish our work in two years"

Replying to @ChelleGentemann and @theNASEM

Congrats Chelle!

The welcoming, inclusive, collaborate-and-reuse culture of the #rstats community is something that changed my science-life and my life-life. Hard to distill but here are a few attempts:

openscapes.org/blog/2020/02/2... openscapes.org/blog/2019/02/1... openscapes.org/blog/2019/08/2...

Replying to @ChelleGentemann and @theNASEM

Probably the most common answer, but using @xarray dev, @dask dev, @ProjectJupyter, and @matplotlib has been the backbone of my research since day 1. Working with these tools also motivates me to make the data and code for my plots open source, making my science more reproducible

7:41 AM · Mar 11, 2022 · Twitter Web App

Replying to @ChelleGentemann and @theNASEM

In remote sensing: using @PyTrollOrg satpy as a comparison point for reading geostationary satellite data, @scitools iris and panoply from @NASA for plotting said data.

12:15 PM · Mar 11, 2022 · Twitter Web App

Replying to @ChelleGentemann and @theNASEM

In computer science, research moves very fast. It would not be possible to keep up with the latest work if not for the arXiv and open-access conferences.

I've briefly returned to the public-private sector (between 2019-21) and the nicest thing about working with OSS during all my career was the ability to show new methods to be applied in that company, which was of clear understanding. helping auditing efforts.

7:56 AM - Mar 12, 2022 - Twitter Web App

Max Grover @mgroverwx - Mar 11

Replying to @ChelleGentemann and @theNASEM Here's a great use-case of @Pv ART, which is funded by @doescience @armnewsteam! Over 200 citations so far, with many including awesome code like this paper which enables

Milind Sharma @Gewitter Blitz - Mar 11

The power of open source software! The authors (@iehcssou and @deeplycloudy) also provide a clean code to encourage reproducible science. I could apply their technique to my dataset within a few hours. Neat! Yes to #OpenScience

First image of black hole

Scott Collis (He/Him)

Replying to @ChelleGentemann @openscience and @theNASEM

Being an open scientist has: 1) accelerated my career. It has allowed me to

choose projects which benefit more people. 2) Has created long lasting collaborations and friendships. When you are open you are... open! 3) Made me a better scientist. "Show your working!"

*** Our friends @SERVIRGlobal have many examples of how algorithms + code from one region have been customized for use in another. An example is gold mining monitoring, where Amazonia + W. Africa have collaborated in an #OpenScience context, leveraging #GEE. 9

simonestaiger @simonestaiger · Apr 8, 2020

Reducing illegal gold mining in the tropical forests of Ghana and Peru: A forthcoming collaboration across the Atlantic #SERVIRamazonia servir.ciat.cgiar.org/illegal-gold-m... @USAIDPeru @SERVIRGIobal @CERSGIS GH @NovoaSidney @amazonacca @sig_gis @BiovIntCIAT_eng

How YOU can Get Involved:

To implement a cultural shift, we need community engagement from the broad spectrum across the scientific community!

We are looking for the community to co-develop with us

Help out on GitHub

Join the discussions

Advocate for open science within your institution, company, agency, community

Build resources and community together
