

**18th World Hydrogen Energy Conference 2010 - WHEC 2010:
Parallel Sessions Book 2:
Hydrogen Production Technologies – Part 1**

WHEC, May 16.-21. 2010, Essen

Detlef Stolten, Thomas Grube (Eds.)

Institute of Energy Research - Fuel Cells (IEF-3)

Guide to the Online Edition

Forschungszentrum Jülich GmbH, Zentralbibliothek, Verlag

Schriften des Forschungszentrums Jülich / Energy & Environment Vol. 78-2

[978-3-89336-652-1](#) / 1866-1793

HP Hydrogen Production Technologies – Part 1

HP.1a Photobiological Hydrogen Production

Design of a Novel Flat-plate Photobioreactor System for Green Algal Hydrogen Production

B. Tamburic, F.W. Zemichael, G.C. Maitland, K. Hellgardt

<http://hdl.handle.net/2128/3910>

3

Photobiotechnological Hydrogen Production with Microalgae

F. Lehr, C. Posten, G. Schaub, O. Kruse

<http://hdl.handle.net/2128/3911>

11

Hydrogen Production by Photosynthetic Bacteria Rhodobacter capsulatus Hup- Strain on Acetate in Continuous Panel Photobioreactors

D. Deo Androga, E. Ozgur, I. Eroglu, U. Gündüz

<http://hdl.handle.net/2128/3912>

17

Poster

Hydrogen Production by Anabaena sp. CH1 with Two-stage Process

P.-C. Chen, C.-L. Chiang, C.M. Lee

<http://hdl.handle.net/2128/3913>

23

The Effect of Temperature and Light Intensity on Hydrogen Production by Rhodobacter Capsulatus

I. Eroglu, P. Sevinç, U. Gündüz, M. Yucel

<http://hdl.handle.net/2128/3914>

27

Photohydrogen Production from Thermophilic Aerobic Digestion Effluent and Distillery Wastewater by Photosynthetic Bacterium Rhodospirillum rubrum WP 3-5

C.M. Lee, C.-L. Tsai, C.-F. Yang

<http://hdl.handle.net/2128/3915>

33

Improving the Hydrogen Production Capacity of Rhodospirillum rubrum by Genetically Modifying Redox Balancing Pathways

Y. Öztürk, A. Gökçe, M. Gürkan, M. Yücel

<http://hdl.handle.net/2128/3916>

37

Photosynthetic Hydrogen Production: Computational & Experimental Results are Indicative that Evolutionary Mutants May Allow for Commercial Viability

S. Plummer, R. Chapas, M. Plummer

<http://hdl.handle.net/2128/3917>

43

An Experimental Study of the Growth and Hydrogen Production of C. Reinhardtii

B. Tamburic, S. Burgess, P.J. Nixon, K. Hellgardt

<http://hdl.handle.net/2128/3918>

47

Immobilization Techniques of Rhodospirillum rubrum O.U. 001 in Hydrogen Generation

M. Thiel, K. Seifert, M. Łaniecki

<http://hdl.handle.net/2128/3919>

53

Continuous Photo-hydrogen Production from Acetate Using Rhodospirillum rubrum WP 3-5

K.-L. Yeh, C.-Y. Chen, Y.-C. Lo, J.-S. Chang

<http://hdl.handle.net/2128/3920>

61

HP.1b Fermentative Hydrogen Production

**Biological Hydrogen Production from Sucrose and Sugar Beet
by Caldicellulosiruptor Saccharolyticus**

J. Panagiotopoulos, R. Bakker, T. de Vrije, P. Claassen, E. Koukios

<http://hdl.handle.net/2128/3921>

69

Microbial Electrolysis Cells for High-yield Biohydrogen Production from Fermentable Substrates

B.E. Logan, P. Selembo, E. Lalaurette, G. Rader, P.-C. Maness

<http://hdl.handle.net/2128/3922>

77

Visible-light Operated Biomass-oxygen Biofuel Cell

Y. Amai, Y. Sakai, Y. Teshima

<http://hdl.handle.net/2128/3923>

81

Development of a Combined Bio-Hydrogen- and Methane-Production Unit Using Dark Fermentation

R. Brunstermann, R. Widmann

<http://hdl.handle.net/2128/3924>

85

A Novel Biological Hydrogen Production System: Impact of Organic Loading

H. Hafez, G. Nakhla, H. El Naggat

<http://hdl.handle.net/2128/3925>

93

Operation of a Two-stage Continuous Fermentation Process Producing Hydrogen and Methane from Artificial Food Wastes

K. Nagai, S. Mizuno, Y. Umeda, N. Osaka, M. Sakka, K. Sakka

<http://hdl.handle.net/2128/3926>

103

Investigating the Link between Fermentative Metabolism and Hydrogen Production in the Unicellular Green Alga Chlamydomonas Reinhardtii

S.J. Burgess, P.J. Nixon

<http://hdl.handle.net/2128/3927>

111

Biohydrogen Fermentation of Mixed Liquid of Kitchen Waste and Napier Grass with Anaerobic Fluidized Bed Process

S.-S. Cheng, Y.-C. Chao, Y.-C. Chen, Y.-M. Tien

<http://hdl.handle.net/2128/3928>

117

Hydrogen and Methane Production from Condensed Molasses Fermentation Soluble by a Two-stage Anaerobic Process

C.-Y. Lin, Y.-C. Liang, C.-H. Lay, C.-C. Chen, F.-Y. Chang

<http://hdl.handle.net/2128/3929>

125

Poster

Effect of Alkalinity and Organic Loading Rate in the Fermentative H₂ Production from an Anaerobic Fluidized Bed Reactor

E.L.C. Amorim, A.R. Barros, E.L. Silva

<http://hdl.handle.net/2128/3930>

133

Biohydrogen Production from Combined Dark-photo Fermentation under a high Ammonia Content in the Dark Fermentation Effluent

C.-Y. Chen, Y.-C. Lo, K.-L. Yeh, J.-S. Chang

<http://hdl.handle.net/2128/3931>

141

A Pilot Study of Nitrogen Composition and Effect on Biohydrogen Production

S.-S. Cheng, M.-D. Bai, Y.-C. Chao, Y.-H. Lin

<http://hdl.handle.net/2128/3932>

145

Biochemical Hydrogen Potential Assessment with Anaerobic Batch Biodegradation of Organic Leachate from Aerobic Bio-leaching Bed Feeding Kitchen Waste and Napier Grass

S.-S. Cheng, S.-C. Wong, K.-H. Yang, Y.-F. Yang

<http://hdl.handle.net/2128/3933>

149

**Analysis of the Glycolytic Pathways of the Hydrogen Producing
Caldicellulosiruptor Saccharolyticus**

S. Kengen, B. Bielen, M. Verhaart, F. Stams

<http://hdl.handle.net/2128/3934>

157

**Using Biomass of Starch-rich Transgenic Arabidopsis Vacuolar
as Feedstock for Fermentative Hydrogen Production**

Y.-C. Lo, C.-L. Cheng, C.-Y. Chen, L.-F. Huang, J.-S. Chang

<http://hdl.handle.net/2128/3935>

163

**Optimizing Fermentation Conditions for bioH₂ Production with
Clostridium Butyricum CGS2 Using Statistical Experimental De-
sign**

Y.-C. Lo, Y.-S., C.-Y. Chen, J.-S. Chang

<http://hdl.handle.net/2128/3936>

169

**Sequential Evolution of Bio-hydrogen from Rubber Industrial Ef-
fluent and its Microbial Interaction to Fermentation Kinetics**

A.G. Murugesan, K. Bala Amutha

<http://hdl.handle.net/2128/3937>

175

**Influence of the Carbon/Nitrogen Ratio on the Hydrogen Produc-
tion in a Fixed-bed Anaerobic Reactor**

M. del Pilar Anzola Rojas, M. Zaiat, W.L. da Silva

<http://hdl.handle.net/2128/3938>

183

**Two-Phase Anaerobic Digestion of Mixed Waste Streams to Sep-
arate Generation of Bio-hydrogen and Bio-methane**

Z. Siddiqui, N.J. Horam

<http://hdl.handle.net/2128/3939>

189

**Hydrogen Generation from Waste Glycerol in Dark Fermenta-
tion Process**

E. Wicher, M. Thiel, M. Laniecki

<http://hdl.handle.net/2128/3940>

195

Continuous Hydrogen Production from Starch by Fermentation

K. Yasuda, S. Tanisho

<http://hdl.handle.net/2128/3941>

201

A High Yield, Hydrogen Producing, Bacterial Community Enriched from Anaerobic Digester Leachate

H. Zheng, C. O'Sullivan, W. Clarke, R. Zeng, M. Duke

<http://hdl.handle.net/2128/3942>

205

HP.1c The HYVOLUTION Project

Non-Thermal Production of Pure Hydrogen from Biomass: HYVOLUTION

P.A.M. Claassen, T. de Vrije, E.G. Koukios, E.W.J. van Niel, E. Özgür, İ. Eroğlu, I. Nowik, M. Modigell, W. Wukovits, A. Friedl, D. Ochs, W. Ahrer

<http://hdl.handle.net/2128/3943>

213

How Environmental Parameters Controls Metabolic Pathways to Hydrogen

K. Willquist, A. Zeidan, E. van Niel

<http://hdl.handle.net/2128/3944>

215

Process Investigations for Development of an Advanced Bioreactor System for Thermophilic H₂ Fermentations

W. Schnitzhofer, W. Wukovits, A. Friedl, W. Ahrer, C. Peintner

<http://hdl.handle.net/2128/3945>

221

Hydrogen Production by Hup- Mutant and Wild Type Strains of Rhodobacter capsulatus on Dark Fermenter Effluent of Sugar Beet Thick Juice in Batch and Continuous Photobioreactors

E. Özgür, B. Uyar, M. Gürkan, M. Yücel

<http://hdl.handle.net/2128/3946>

229

Removal of the Effect of Ammonium on the Regulation of Nitrogenase Enzyme in Rhodobacter Capsulatus DSM1710 for Improved Hydrogen Production

G. Pekgöz, U. Gündüz, İ. Eroğlu, G. Rákhely

<http://hdl.handle.net/2128/3947>

235

LCA of a Non-thermal Production of Pure Hydrogen from Biomass

W. Ahrrer, D. Ochs, W. Schnitzhofer

<http://hdl.handle.net/2128/3948>

241

Optimization of a Two-stage Bio-hydrogen Fermentation Process

W. Wukovits, D. Foglia, A. Friedl, M. Ljunggren

<http://hdl.handle.net/2128/3949>

249

Poster

HP.2 Thermochemical Cycles

Thermochemical Cycles

C. Sattler

<http://hdl.handle.net/2128/3950>

257

Improving Sulphur Dioxide Yield in the Sulphuric Acid Thermal Decomposition Process through the Application of High Temperature Ceramic Membrane Separations

R.H. Elder, I. Atkin, G.H. Priestman, D.C. Sinclair, R.W.K. Allen

<http://hdl.handle.net/2128/3951>

259

HycycleS – A Project on Solar and Nuclear Hydrogen Production by Sulphurbased Thermochemical Cycles

M. Roeb, D. Thomey, D. Graf, L. de Oliveira, C. Sattler, S. Poitou, F. Pra, P. Tochon, A. Brevet, G. Roux, N. Gruet, C. Mansilla, F. LeNaour, R. Allen, R. Elder, I. Atkin, G. Kargiannakis, C. Agrafiotis, A. Zygogianni, C. Pagkoura, A.G. Konstandopoulos, A. Giaconia, S. Sau, P. Tarquini, T. Kosmidou, P. Hähner, S. Haussener, A. Steinfeld, I. Canadas, A. Orden, M. Ferrato, Boostec

<http://hdl.handle.net/2128/3952>

267

The Effect of Anolyte Product Acid Concentration on Hybrid Sulfur Cycle Performance

M.B. Gorenssek, W.A. Summers

<http://hdl.handle.net/2128/3953>

275

In Situ Composition Measurements of Bunsen Reaction Solution by Radiation Probes

S. Kubo, Y. Nagaya

<http://hdl.handle.net/2128/3954>

283

Relationship between Density and Composition of HI-I2-H2O in I-S Process

S. Chen, H. Guo, P. Zhang, J. Xu, L. Wang

<http://hdl.handle.net/2128/3955>

291

Demonstration of Hydrogen Production by the Sulphur-Iodine Cycle: Realization of a 10 NL/h Plant

R. Liberatore, G. Caputo, C. Felici, A. Spadona

<http://hdl.handle.net/2128/3956>

295

Development of Mixed Metal Oxides for Thermochemical Hydrogen Production from Solar Water-splitting

A. Le Gal, S. Abanades, G. Flamant

<http://hdl.handle.net/2128/3957>

301

Demonstration of Solar Hydrogen Production from Water Splitting via Monolithic Honeycomb Reactors in a 100-kW-Scale Pilot Plant

C. Agrafiotis, A.G. Konstandopoulos, S. Lorentzou, C. Pagkoura, A. Zygogianni, M. Roeb, J.-P. Säck, P. Rietbrock, C. Prah, H. Schreiber, M. Neises, M. Ebert, W. Reinalter, M. Meyer-Grünefeld, C. Sattler, A. Lopez, A. Vidal, A. Elsberg, P. Stobbe, D. Jones, A. Steele

<http://hdl.handle.net/2128/3958>

307

Towards Industrial Solar Production of Zinc and Hydrogen – Modeling and Design of a 100 kW Solar Pilot Reactor for ZnO Dissociation

D. Gstoehl, T. Cooper, W. Villasmil, A. Meier

<http://hdl.handle.net/2128/3959>

313

“Steam-Iron” Process for Hydrogen Production: Recent Advances

J.A. Peña, E. Lorente, J. Herguido

<http://hdl.handle.net/2128/3960>

319

Poster

Analysis of Reaction Kinetics for a Two-step Hydrogen Production Process Utilizing Porous Iron Powder

F. Al-Raqom, B. Greek, J.F. Klasuner, S.A. Sherif

<http://hdl.handle.net/2128/3961>

323

Thermodynamic Performance Comparison of some Renewable and Non- Renewable Hydrogen Production Processes

M. Tolga Balta, A. Hepbasli, I. Dincer

<http://hdl.handle.net/2128/3962>

331

Two-step Water Splitting by Cerium Oxide-Based Redox Pairs

H. Burghardt, M. Schmücker, B. Hansen, M. Neises, M. Roeb

<http://hdl.handle.net/2128/3963>

343

Low Temperature Separations in the Sulphuric Acid Decomposition Stage of the Sulphur Iodine and Hybrid Sulphur Thermochemical Water Splitting Cycles

R.H. Elder, A. Shaw, M. Romero, N. Elbakhbakh, G.H. Priestman, R.W.K. Allen

<http://hdl.handle.net/2128/3964>

349

Analysis and Development of the Bunsen Section in the Sulphur-Iodine Process

A. Giaconia, S. Sau, G. Caputo, M. Parisi

<http://hdl.handle.net/2128/3965>

355

Chemical Characterization of Sulphur-Iodine Thermochemical Cycle Flowstreams by Raman Spectroscopy

R. Liberatore, M. Falconieri, M. Lanchi, A. Spadoni

<http://hdl.handle.net/2128/3966>

363

Thermoeconomic Analysis of a Copper-Chlorine Thermochemical Cycle for Nuclear-Based Hydrogen Production

M.F. Orhan, I. Dincer, M.A. Rosen

<http://hdl.handle.net/2128/3967>

371

Effect of Impurities of the Solid on the Subsequent Hydrogen Release in Steam- Iron Process

*J.A. Peña, A. Palacios, L. Martínez, E. Romero, P. Durán, J. Her-
guido*

<http://hdl.handle.net/2128/3968>

379

Methanol from CO₂ and Solar Energy – A Literature Review

M. Schmitz, S. Kluczka, C. Vaeßen

<http://hdl.handle.net/2128/3969>

383
