flexible structure
& layout

JOIN² common repository infrastructure

- easy to use for scientists e.g. publication lists
- publication & OA portal
- workflow support
- precise data source for institutional analyses (e.g. performance indicators) ... and many more

based on
CERN
INVENIO
software

6
independent
repositories in
operation

as a
service for
20.000 staff
members &
about 5000
scientific
visitors

90.000
high-quality
authority records
freely available
on the Internet

more
than
300.000
records
