High Performance Computing for Science & Engineering

'Bridges between Experiment and Theory'

Prof. Dr. - Ing. Morris Riedel

Head of Research Group 'High Productivity Data Processing'
Juelich Supercomputing Centre, Germany

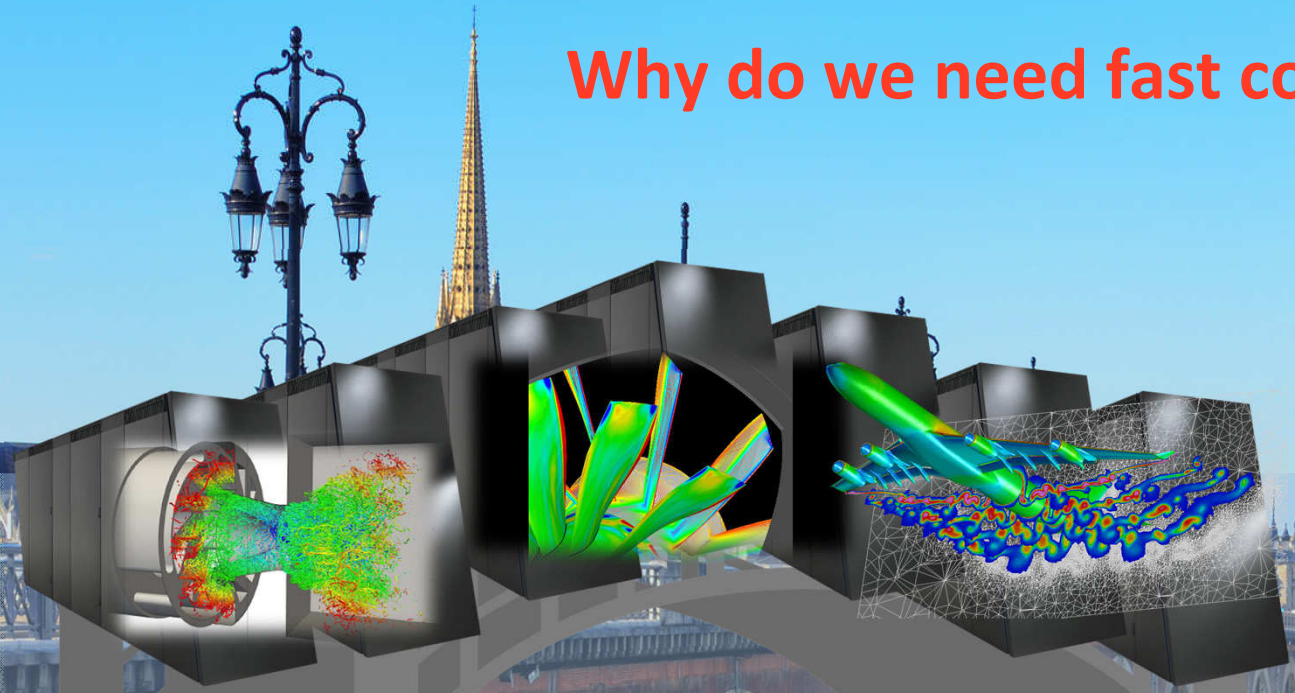
Adjunct Associated Professor
School of Engineering and Natural Sciences, University of Iceland

JÜLICH FORSCHUNGSZENTRUM
HELMHOLTZ ASSOCIATION

UNIVERSITY OF ICELAND
SCHOOL OF ENGINEERING AND NATURAL SCIENCES
FACULTY OF INDUSTRIAL ENGINEERING, MECHANICAL ENGINEERING AND COMPUTER SCIENCE

High Performance Computing

Why do we need fast computing?



Numerical calculations… Model

…simulation over time

Experiment
'we observe the nature'

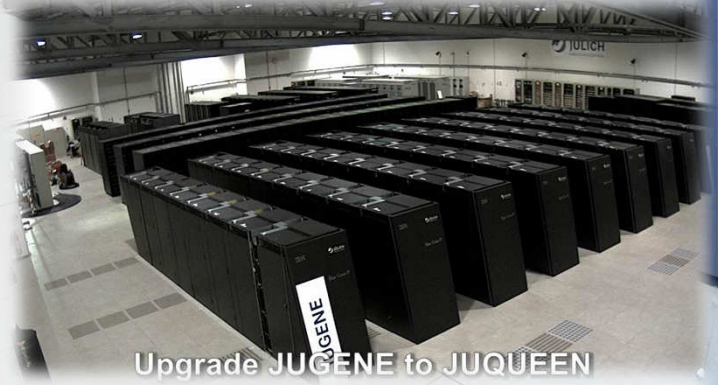
Theory
'we create a model of nature'

Fast = n Floating Point Operations (FLOP) per one second

1 FLOP/s
Example:
*93386.25 *10^8*
= ???

>5.000.000.000.000.000 FLOP/s
~ 500.000 cores
~ 2015

1.000.000.000.000.000 FLOP/s
~295.000 cores~2008 (JUGENE)



1.000.000 FLOP/s
~1984

Scientific & Engineering Applications use Parallel Computing

Reseach on ‘Big Data Waves‘ in Science & Engineering

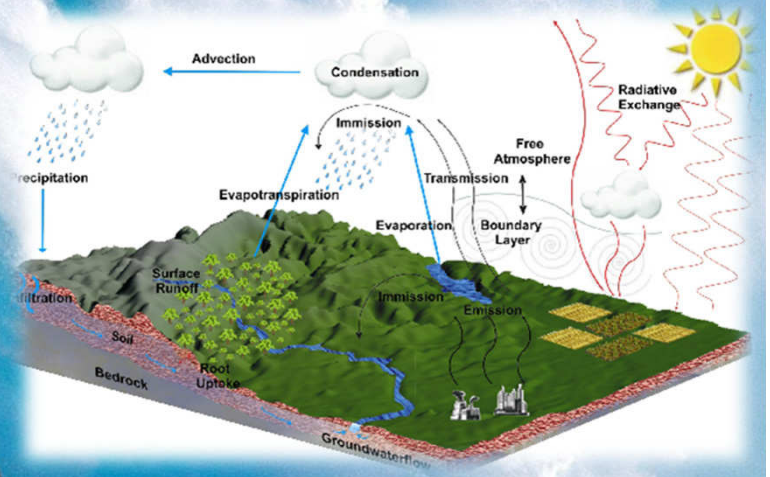
How can we manage the rising tide of ever-increasing data?

Unsolved questions:

Scale
Heterogeneity
Stewardship
Curation
Long-Term Access and Storage

Challenges:

Collection, Trust, Usability
Interoperability, Diversity
Security
Education and training
Data publication and access
Commercial exploitation
New social paradigms
Preservation and sustainability

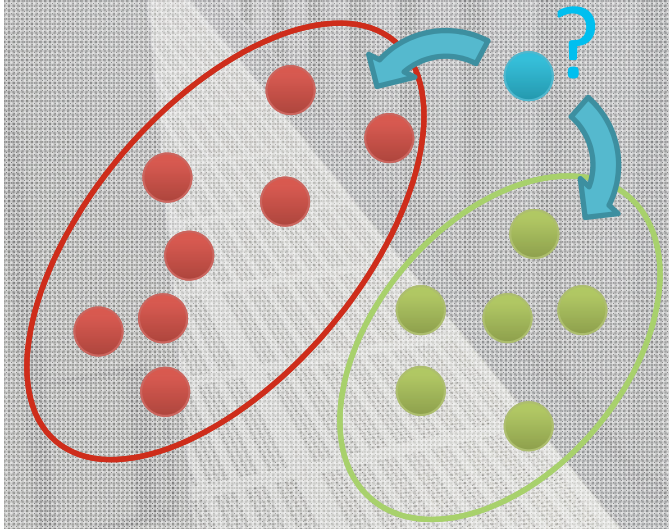


How do we efficiently analyse these large quantities of data?

Making use of Big Data

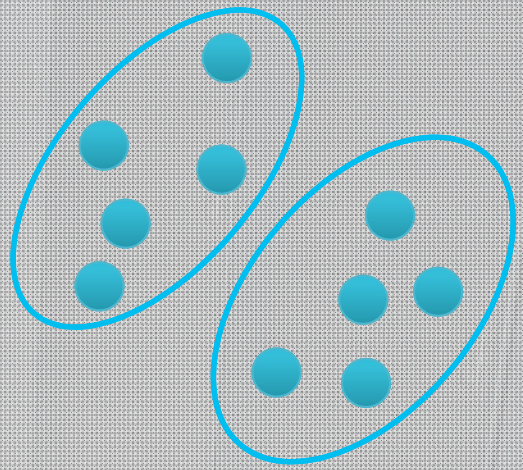
Applying 'smart data analytics' techniques

Classification



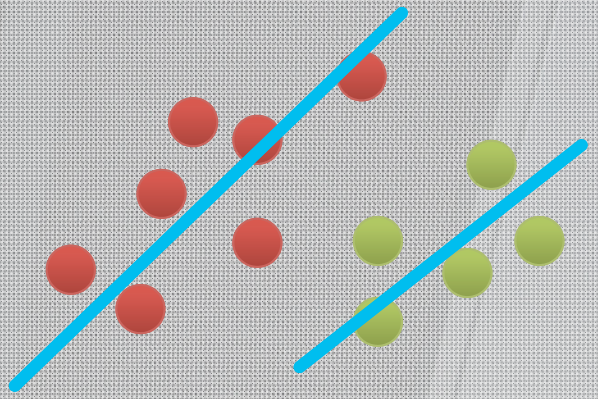
- ✓ *Groups of data exist*
- ✓ *New data classified to existing groups*

Clustering



- ✓ *No groups of data exist*
- ✓ *Create groups from data close to each other*

Regression



- ✓ *Identify a line with a certain slope describing the data*

➢ *Serial algorithms for large volumes of data exist since decades, 'big data' needs their parallelization*

Can I do this in Iceland? – Yes!

Where do I get fast computing?

Nordic HPC

Joint Nordic Supercomputer in Iceland

UNIVERSITY OF ICELAND

advania thor data center

SNIC

nhpc

DCSC
Danish Center for Scientific Computing

UNINETT sigma
