REGISTRY OF RESEARCH DATA REPOSITORIES

lists

2332 research data repositories

from

75 countries

covering

74 subjects from acoustics to zoology

COREF Community Driven Open Reference for Research Data Repositories

is a proposed project that seeks to **improve**, **extend** and **update re3data**

Use unique identification in machine-to-machine (M2M) communication to foster the usage of re3data as an open reference for repositories.

Import and export of metadata fragments, controlled vocabularies and database entries of external sources.

Address funding bodies and publishers to recommend re3data in their respective policies to foster the usage of trustworthy repositories complying with the FAIR-principles.
