

OPEN ACCESS MONITOR GERMANY

SONAR Workshop OA Monitoring 2019, Bern

04.12.2019 | IRENE BARBERS, PHILIPP POLLACK | Forschungszentrum Jülich, Central Library

Member of the Helmholtz Association

MONITORING THE TRANSITION TO OPEN ACCESS

- Reliable Data is needed to support the transition to Open Access and to monitor the shift of financial flows
 - Publications data: count of publications per publisher, per journal, per institution; proportions of Open Access and Closed Access
 - Cost data: subscription expenditure and publication fees
 - Usage data
 - Citations
- Until 2018 only singular reports with a limited scope available
 - On federal state level (for Berlin in 2016)
 - For individual institutions (OA Barometer, FZ Jülich)
- **Universally desirable for all academic institutions**

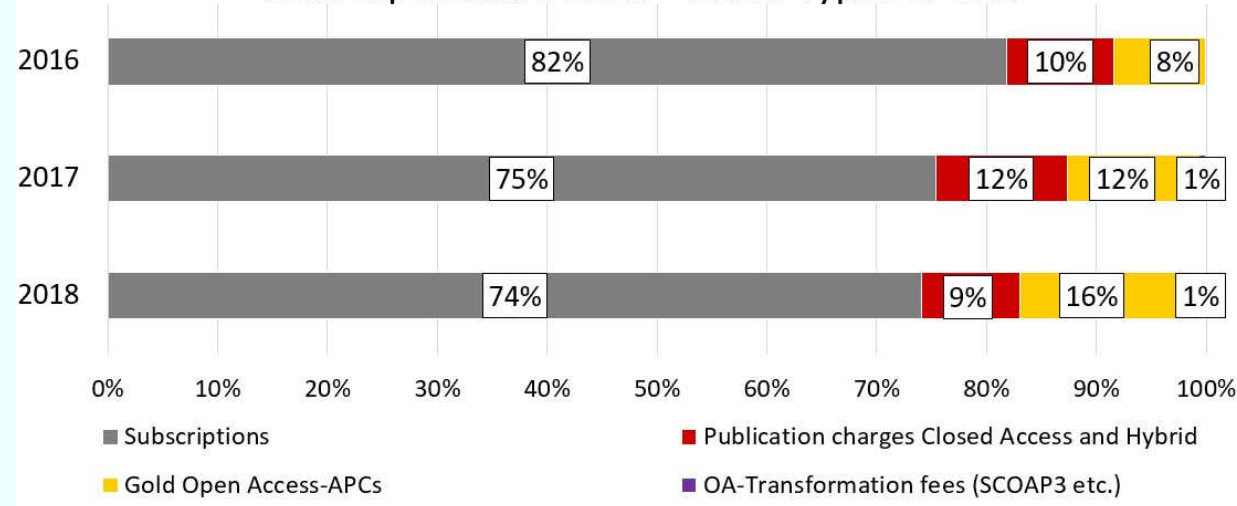

MONITORING THE TRANSITION AT THE LOCAL LEVEL

Open Access Barometer Forschungszentrum Jülich

Shares of publishing houses in number of publications and in total expenditure 2018

Total expenditure 2016 – 2018: Types of cost

OPEN ACCESS MONITOR GERMANY: PROJECT ORGANIZATION

- Data Office for the National Contact Point Open Access **OA2020-DE** - funded by the **Alliance of Science Organizations in Germany** to support the large-scale Open Access transformation until mid-2020: 1 of 3 FTEs
- **SynOA** - funded by the **Federal Ministry of Education and Research** as a part of the national Open Access Strategy until mid-2020: 2 FTEs + part-time contributions from FZ Jülich staff
- Application for continued funding in preparation

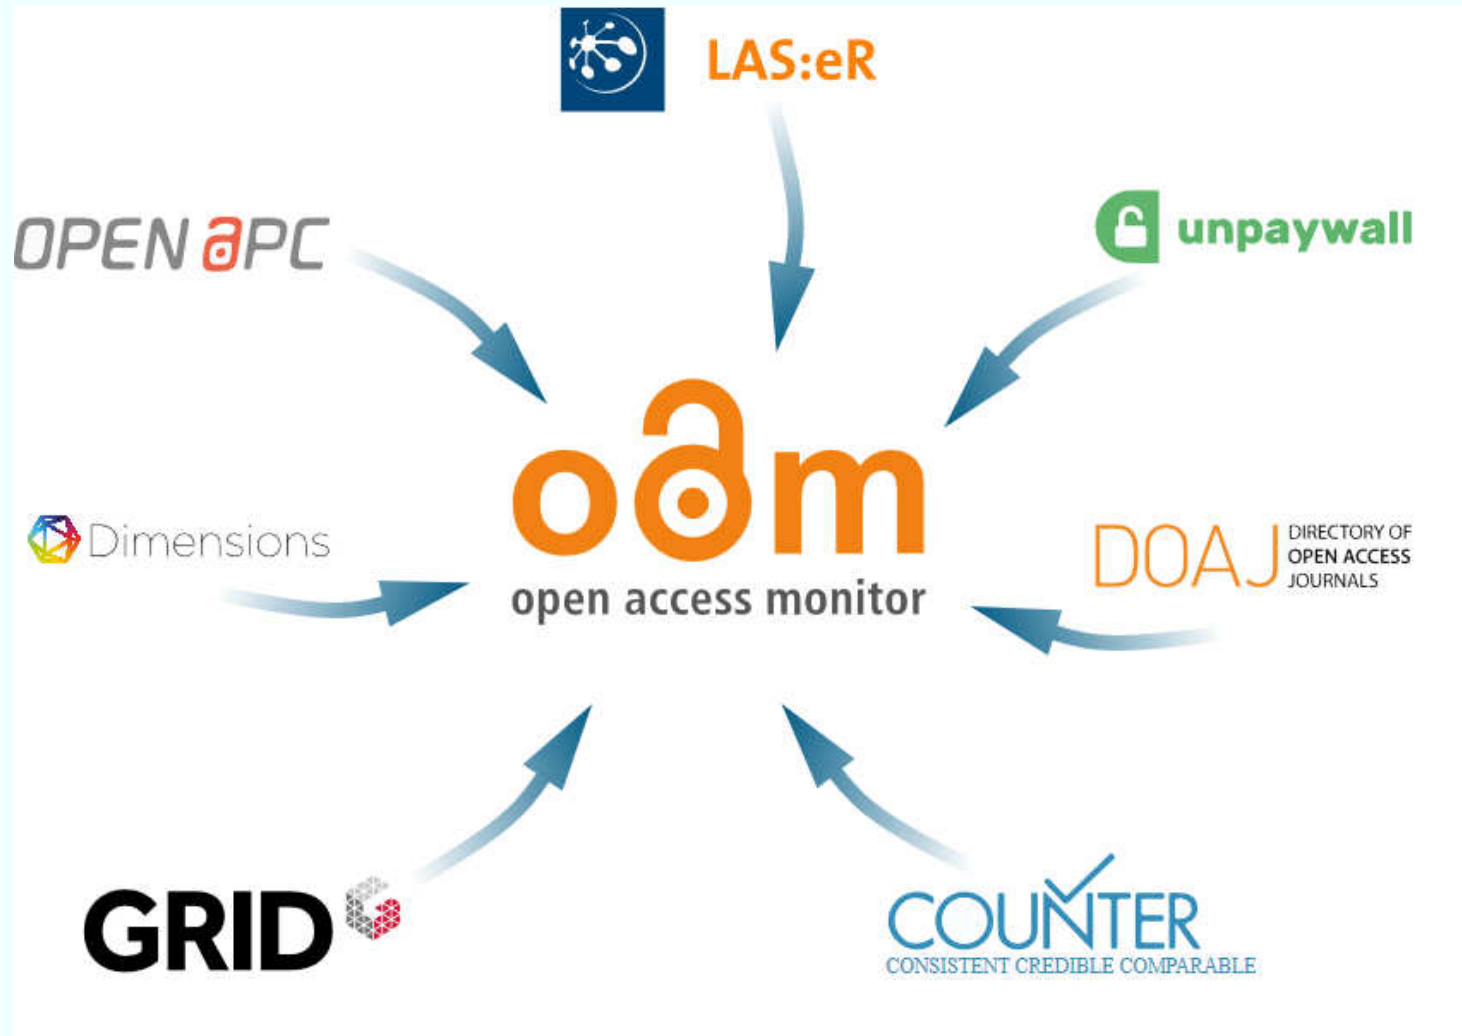

PROJECT MISSION

- The Open Access Monitor Germany aims to cover the full extent of publications that have been published by German academic institutions in scholarly journals
- By analysing subscription expenditure and publication costs we observe and support the transition to the Open Access model in German scholarly publishing
- The Open Access Monitor Germany builds upon systems which are already in existence or are currently being developed
- It serves as a data warehouse for OA2020-DE, e.g. compiles supporting data and prepares reports to inform negotiations for transition agreements

PROJECT STAKEHOLDERS

- **National and regional authorities** gain detailed overview of the situation in their area of responsibility
- **Funders** may prioritize and evaluate their programmes
- **Institutions** may identify scientific areas where they can increase their efforts
- **Libraries** may negotiate fact-based agreements for the transition to Open Access and switch funds from subscription budgets to publication funds
- **ScholComm Researchers** have access to data for research on scholarly publishing
- **Publishers** can verify their own data on publications

VIEWS AND ANALYSES

OPEN ACCESS MONITOR GERMANY: SUMMARY

- Database developed, set up and running
- Data sources integrated
- Web Interface established and already well used by the community
- Libraries are advised on use of web interface and interpretation of data, e.g. in the DEAL context
- API and Query Tool provided
- Code snippets for embedding into institutional websites

OPEN ACCESS MONITOR GERMANY: OUTLOOK

- Expand data on subscription expenditure
- Integrate additional data sources
- Investigate possibilities for monitoring of traditional publication costs, e.g. colour charges
- Develop more functionalities for different use cases and according to user feedback
- Supply more views and analyses, e.g. views for consortia
- Integrate usage data
- Introduce mapping to fields of research
